Best education-related memories from BHS:

- Forty-three years after graduation, I can still name all my teachers, and list something positive I took away from every one of them. Every teacher genuinely cared about us, wanted us to learn, and shared their skills with us. This says something about the quality of teachers at BHS and is such a positive reflection of all the great memories I retain to this day of my time at Batesville High School.
- I do need to single out Ron Raver. He gets special recognition for putting up with me, as I ran four years for him on his cross-country team and three years on this track team - - - Truly a saint!

A personal quote about the importance of education:

- I like this quote from Malcolm X: "Education is the passport to the future, for tomorrow belongs to those who prepare for it today."
