Best education-related memories from BHS:

- My favorite academic memories from BHS were the history classes that I took. History has always been my favorite subject. United States History, Geography, and Government were all fascinating. I believe an understanding of the world and its history is crucial to the development of society and creating responsible citizens. The education I received throughout Batesville Community Schools (Batesville Primary, Intermediate, Middle and High Schools) definitely prepared me for college and my career. My mentorship experiences, teacher expectations, as well as the AP and Ivy Tech course options allowed me to complete my college undergraduate program in three years. The expectations set for high school students at Batesville High School resulted in a smooth transition and preparation for the level of work necessary to be successful in college.

A personal quote about the importance of education:

- "Education never ends. Embrace it and enhance the world around you."
